

REI603M - Assignment 9

Final Project Progress and Demo

Please submit this assignment online through the Canvas platform. If your submission consists of multiple files, compress them into a single .zip file before uploading.

Objective

Make substantial progress on your final project and present a demo showcasing your work. Both product and research projects should submit a video of their progress and demo.

Progress Suggestions

Choose one or more of the following:

- Fix labelling issues using tools like Cleanlab and retrain models.
- Add monitoring to your deployed model.
- Improve your user-friendly front-end interface.
- Implement monitoring to track user interactions and gather insights.
- Explore alternative models to compare against your baselines.
- Implement and improve your model.
- Run a [survey](#) to understand customer needs and shape your project.

Submission Guidelines

Submit a 5-7 minute well-structured, engaging video highlighting your weekly progress and the value or usability of your product or research. Outline your accomplishments and present your plans for completing the project, including future work potential.

Peer Evaluation

Evaluate your classmates' work on two scales (1-5): quality of work done and ambition of plan and future work potential. Provide one open-ended question or constructive comment to help enhance their project.

Submission Deadline: March 22, 2023, at 23:00

For any difficulties or questions, contact us via the Ed platform or email hafsteinne@hi.is.
